

# Fishing Tools and Kayak Accessories at the ICAST Show

BY TONY HART • JULY 27, 2018 • KAYAK RIGGING REVIEWS, OPINION • COMMENTS (0) • ♥27

Rigging accessories and fishing tools will get an angler fired up just as much as that new yak they just bought. Getting the chance to rig up your new toy is enough to get any angler excited. Here's some of the fishing tools and kayak accessories that we checked out at the ICAST show.

## Cuda Brand

### Professional Pliers

The eight-inch, Professional Pliers features Titanium Alloy jaws that are resistant to both rust and corrosion.

An integrated cutter easily slices through braid, mono, fluorocarbon and light wire. The multi-layer, two-tone, cold-molded Micarta® handles with full-tang construction ensure a firm grip, while a custom, hard-molded sheath with attached lanyard securely stores the tool when not in use. Both the Professional Snip and Professional Pliers are backed by the Cuda lifetime warranty.

### Professional Snips

The eight-inch, Professional Snip uses Titanium Non-stick, German 4116 stainless steel blades that are corrosion-resistant and include a micro-serrated edge to quickly cut strapping, netting and fins, in addition to wire, braid, mono and fluorocarbon. With blades that are five times harder than untreated stainless steel, it stays sharper, longer and provides a versatile, dependable tool while on the water.

The handles are multi-layer, two-tone, cold-molded Micarta® with full-tang construction and a lock for safety and storage. A custom, hard-molded sheath firmly holds the snip in place, with an attachable lanyard which adds safety and security for the tool while making cleanup a snap.
